1 Introduction

1.1 Documentation Details:

- ❖ Application Name: Assignment 01 – Front-End Website
- ❖ Version Number: **V1.0**
- ❖ Author(s) Details:
 - Name: Dulaj Jayasingha
 - Role: Concept Designer, Developer and Documentation Writer
 - Email: nisaladn@gmail.com
 - LinkedIn: <https://www.linkedin.com/in/dulaj-jayasingha>
- ❖ Last Updated Date: November 26, 2024
- ❖ Used Technology: **HTML5, CSS3, JavaScript (ES6)**

1.2 Business Overview:

The **JD STYLE Web Application** is a modern, user-friendly front-end website developed to cater to the needs of a dynamic clothing store. Designed with a focus on delivering a seamless shopping experience, the application integrates innovative features to enhance customer engagement and satisfaction.

JD STYLE is a leading clothing store offering a range of high-quality fashion products for men and women. The business also provides premium services such as a VIP program, a cafe and resort, and customized clothing options, ensuring a unique value proposition for its customers.

1.3 Purpose of the Application:

The **JD STYLE Web Application** is a modern, efficient, user-friendly front-end website designed to meet the needs of a dynamic clothing store. The platform offers a range of user-friendly features, including seamless product browsing, an intuitive checkout process, advanced filtering options, and convenient size selection. Additionally, it supports VIP membership registration and dynamic capabilities, such as changing currency based on the user's location, improving the overall shopping experience.

1.4 Target Audience:

The target audience includes fashion-conscious individuals from young adults to adults who appreciate convenience and luxury shopping, expect high-quality apparel and personalized service.

2 Getting Started

2.1 System Requirements:

Before accessing or installing the JD STYLE Web Application, ensure your system meets the following requirements:

- **Browser Compatibility:** Google Chrome (v90+), Mozilla Firefox (v85+), Safari (v14+), Microsoft Edge (v89+)
- **Operating System:** Windows 10 or higher, macOS Mojave or higher, or the latest Linux distributions.
- **Hardware:** At least 2GB of RAM and a stable internet connection.

2.2 Configuration:

Default Settings: The application is pre-configured with default settings, such as:

- **Currency:** Set to “Sri Lanka LKR (Rs)” by default.
- **Language:** Defaults to English but can be changed in settings.
- **Theme:** Set to “Light Mode” by default.

Custom Settings: Users can modify settings through the **Profile** section after login.

3 Application Overview

The **JD STYLE Web Application** is a feature-rich platform designed to streamline the online shopping experience for customers while showcasing the brand's identity and offerings. This section provides an in-depth look at the application's structure and functionality, organized into the following sub-topics:

3.1 Platform Compatibility:

The application is designed to operate seamlessly across multiple platforms:

- **Desktop:** Optimized for large screens with intuitive navigation and detailed product displays.
- **Mobile and Tablets:** Responsive design ensures usability on various screen sizes, with touch-friendly interfaces and streamlined layouts.

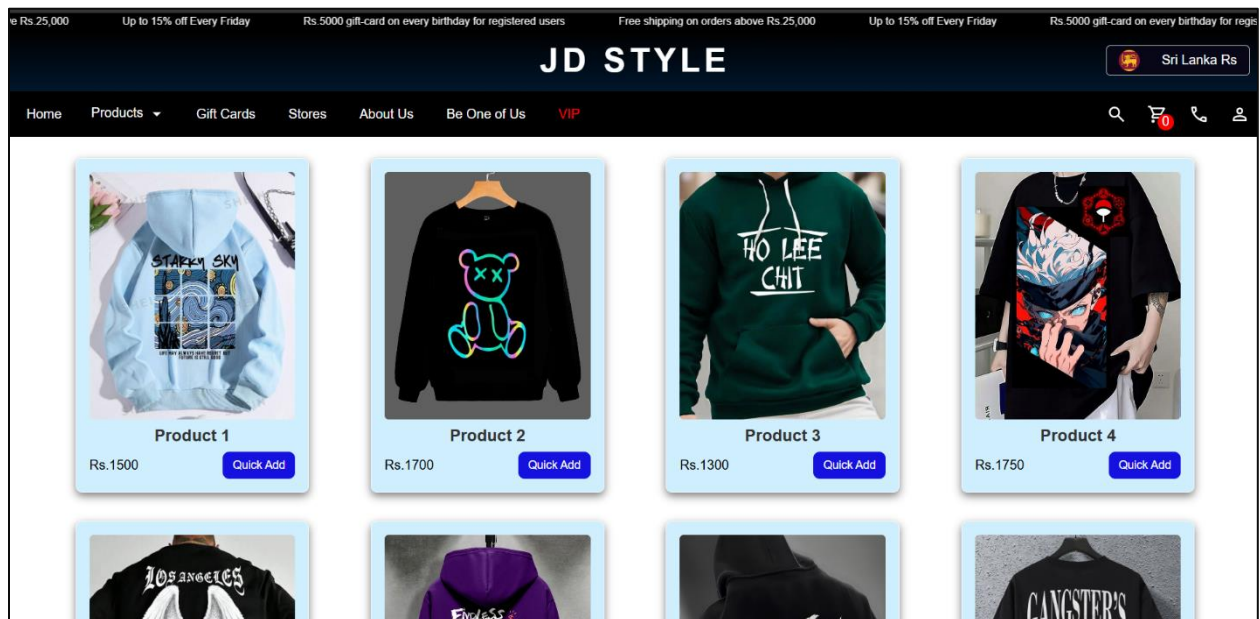

3.2 Modules and Components Structure:

3.2.1 Main Modules:

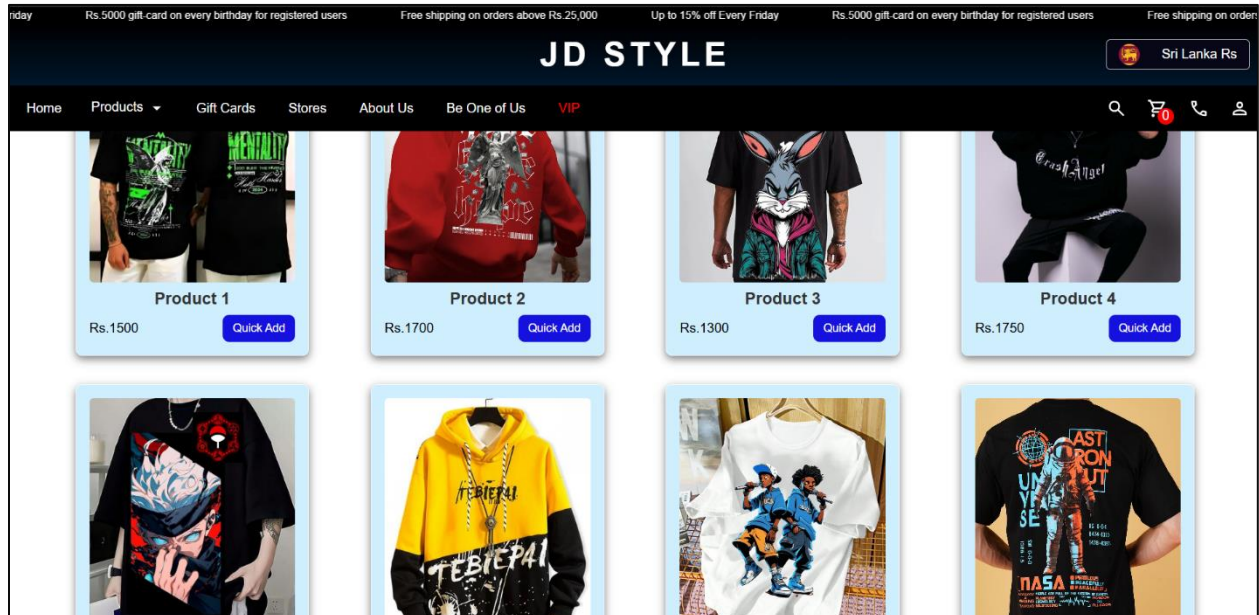

In here is the application main pages breakdown:

- **Home Page (home.html)**
 - Features: Currency Change, Slideshow for Banners, Product Pages (Horizontal Scroll), Customer Feedbacks, Partner Companies
 <-- Picture here: "HomePage_Layout.png" -->
- **Product Pages**
 - There are 3 Product Pages as All Products, New Arrivals, Popular Items.
 - Features: Add to Cart, Product Filters

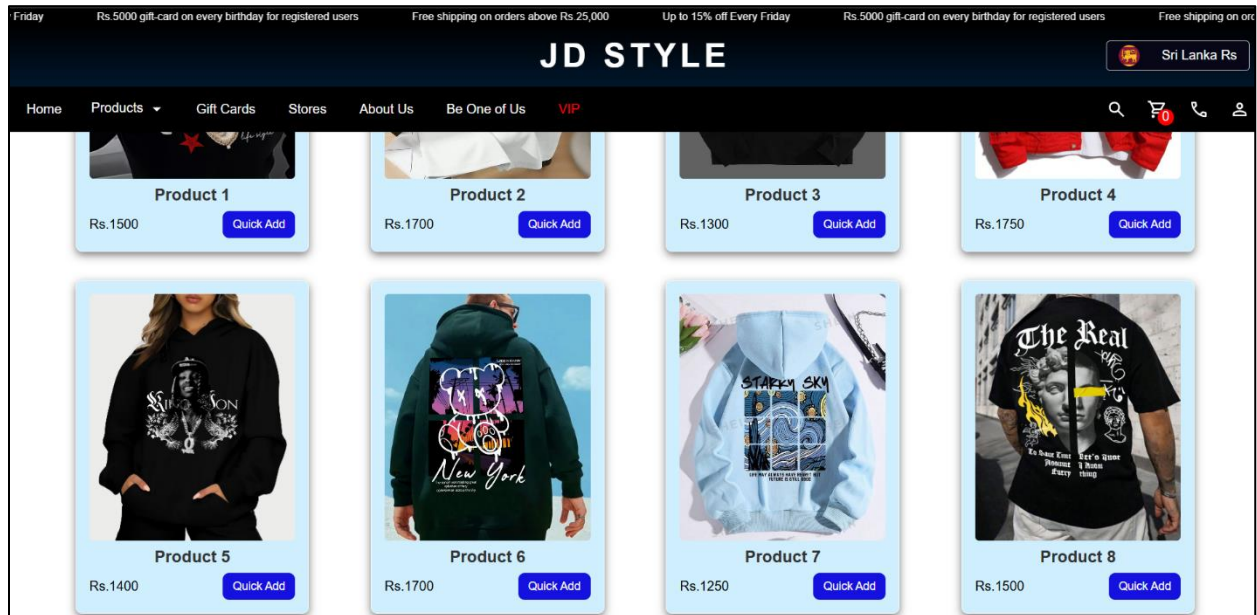

<-- All Products Page (product-all.html)-->

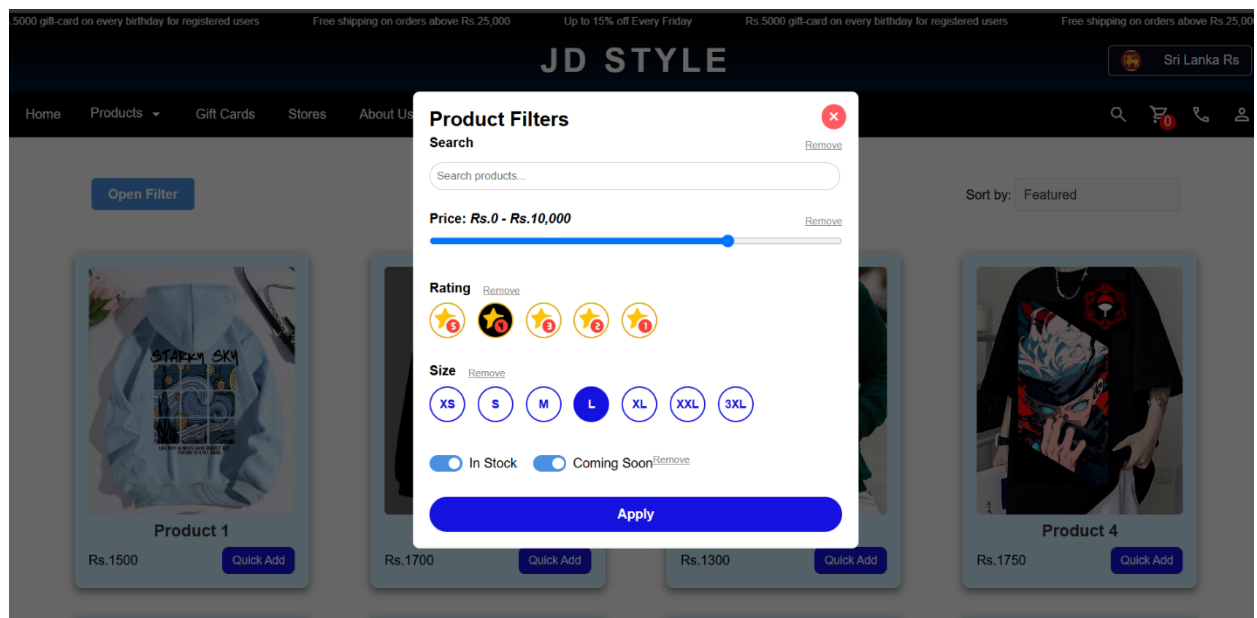

<-- Popular Products Page (product-popular.html) -->

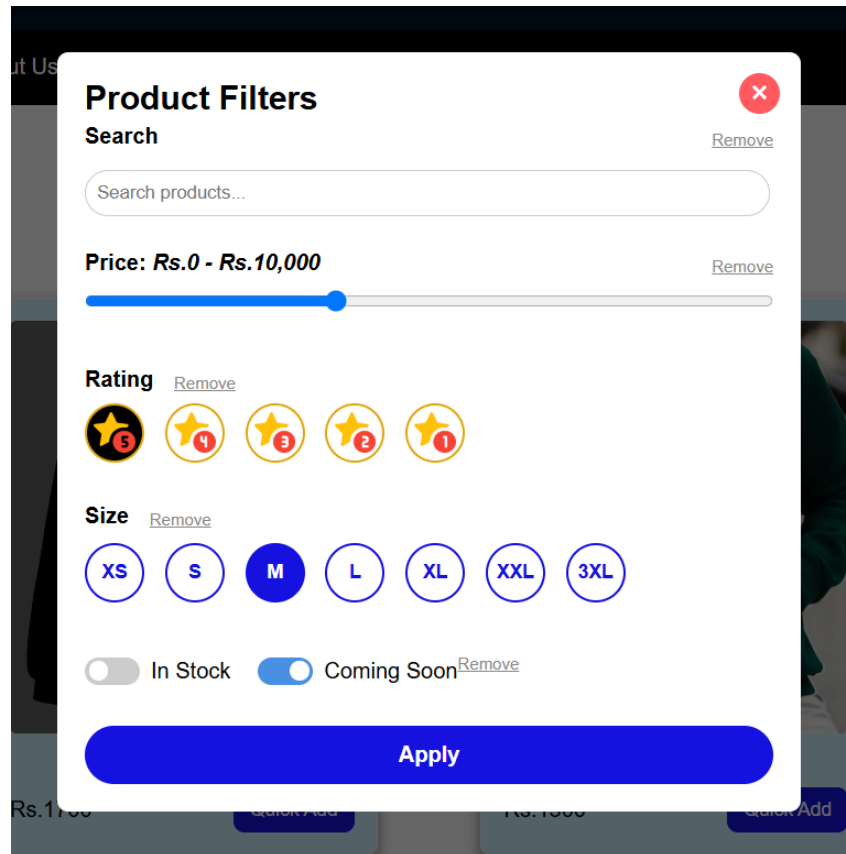

<-- New Arrivals Page (product-new-arrivals.html) -->

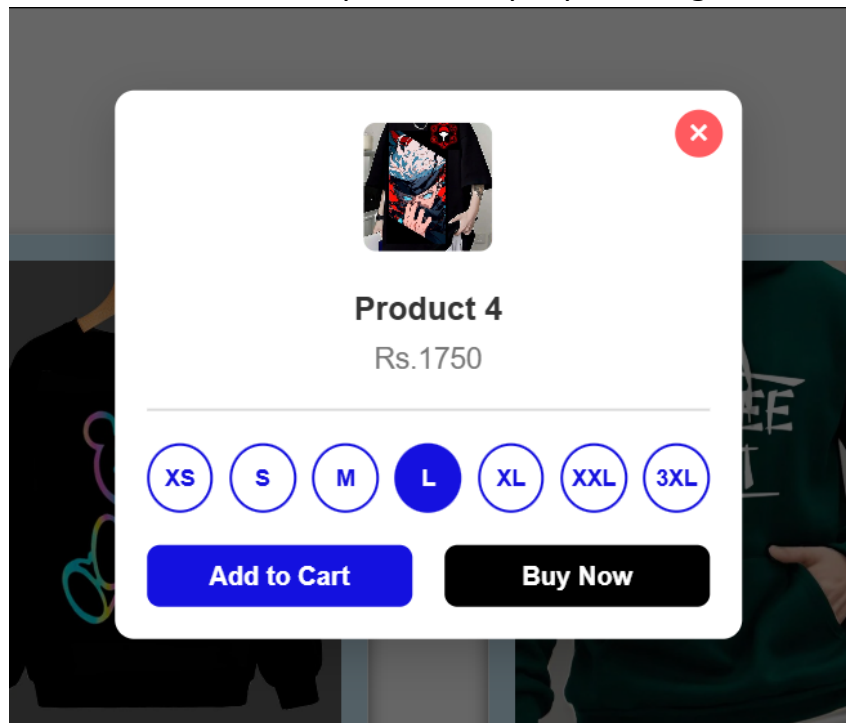

<-- Product Filter Option as Pop-Up Message -->

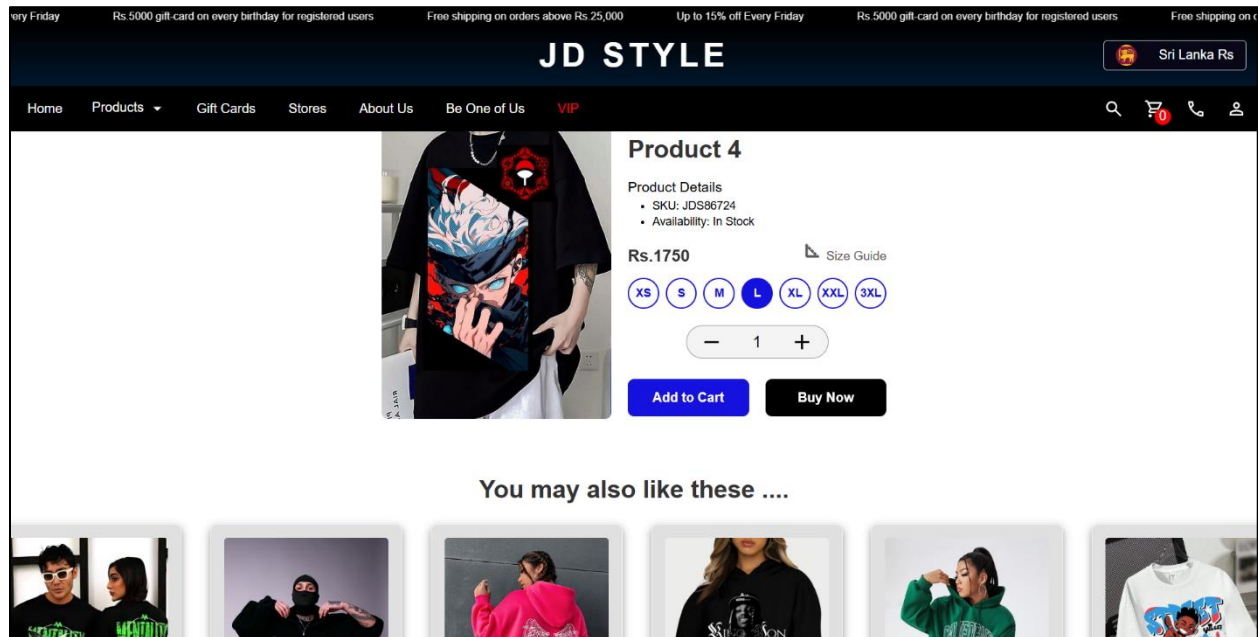

<-- Add to Cart Option as Pop-Up Message -->

- **Product Details pages**

- Product Details, Quantity Changes, Product Subtotal Calculation

<-- Product Details Pages (product-all-details.html /
product-popular-details.html /
product-new-arrivals-details.html) -->

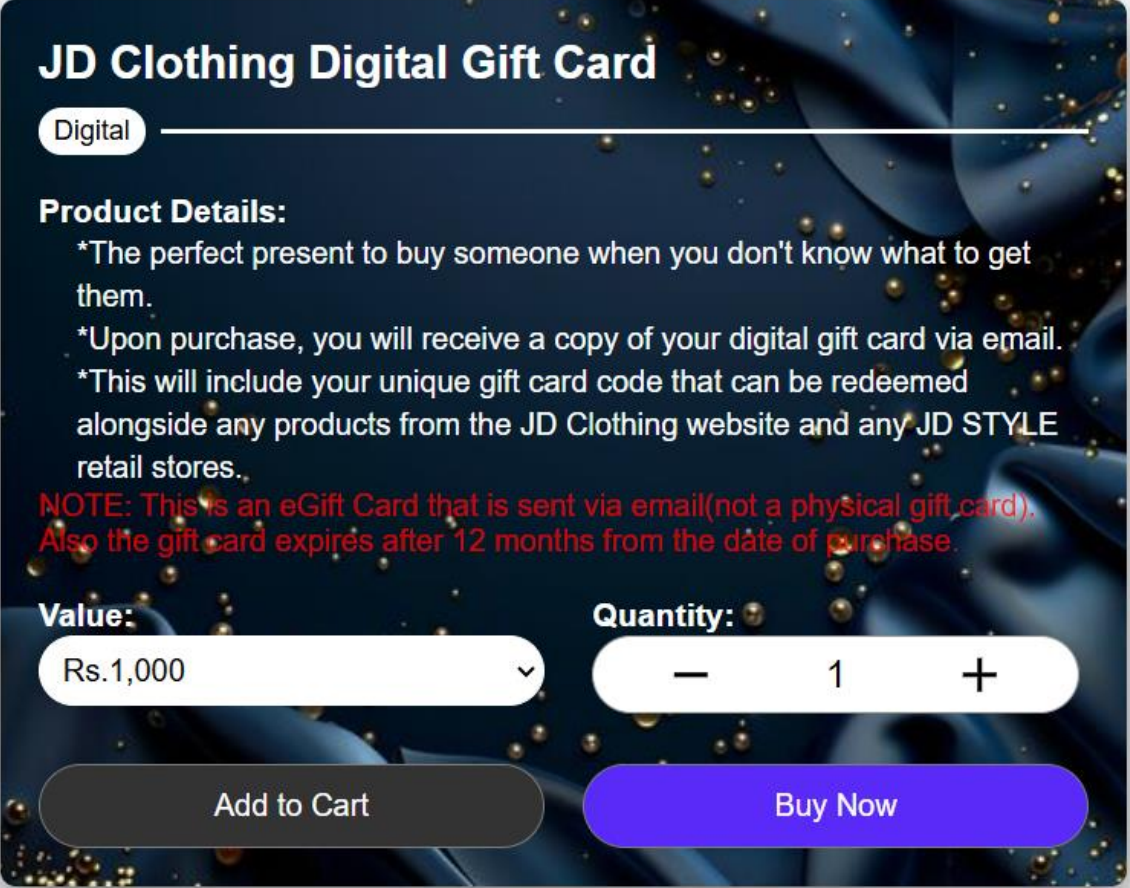

<-- Product Details Layout -->

- **Gift Card Page (gift-card.html)**
 - Price Range: Rs. 1000 to Rs. 20,000, Customizable Options

<-- Gift Card Layout -->

The image shows a digital gift card interface for JD Clothing. The background is a dark blue, textured surface with golden, shimmering particles. At the top, the title "JD Clothing Digital Gift Card" is displayed in a bold, white font. Below the title, a "Digital" label is enclosed in a white pill-shaped button. The "Product Details:" section contains three bullet points: "*The perfect present to buy someone when you don't know what to get them.", "*Upon purchase, you will receive a copy of your digital gift card via email.", and "*This will include your unique gift card code that can be redeemed alongside any products from the JD Clothing website and any JD STYLE retail stores." A red text note follows: "NOTE: This is an eGift Card that is sent via email(not a physical gift card). Also the gift card expires after 12 months from the date of purchase." Below this, the "Value:" section features a white input field with "Rs.1,000" and a downward arrow. The "Quantity:" section has a white pill-shaped button with minus, "1", and plus icons. At the bottom, there are two buttons: a grey "Add to Cart" button and a purple "Buy Now" button.

JD Clothing Digital Gift Card

Our Stores

Since its big launch in just a year, JD Style has opened four retail stores across prime locations, providing an in-person shopping experience that blends high-quality fashion with exceptional service. Each store is designed to offer a welcoming and stylish atmosphere, reflecting our commitment to comfort and class.

Our VIP customers also have exclusive access to our Cafe & Resort, which offers a serene escape where they can relax and enjoy a range of premium services. This unique aspect of JD Style gives our community a space to connect and immerse themselves in a lifestyle synonymous with elegance and exclusivity.

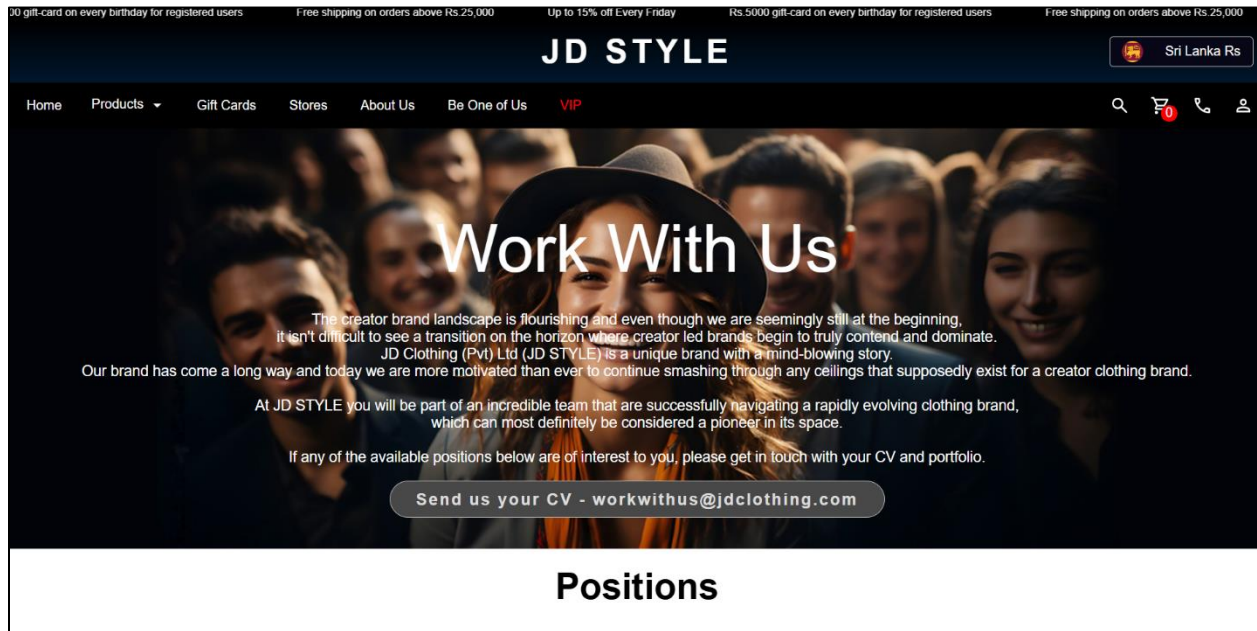

- **Retail Store Manager:** Oversees all in-store operations, ensuring that each visit to JD Style is a memorable experience.
- **E-Commerce Manager:** Manages our online platform, providing a seamless shopping experience for our digital customers.
- **Marketing Manager:** Crafts our brand story, connecting with our audience through creative campaigns and promotions.
- **Logistics & Supply Chain Manager:** Ensures our products are available and delivered on time, every time.
- **Customer Service Manager:** Provides attentive and personalized support, making every customer feel valued.
- **Sales Manager:** Drives our growth, focusing on meeting customer needs and surpassing their expectations.
- **HR Manager:** Builds a positive workplace culture, attracting and retaining the best talent in the industry.
- **Finance Manager:** Manages our financial health, enabling JD Style to invest in new opportunities and innovations.
- **Product Manager:** Curates and develops our product range, keeping it aligned with our brand values and customer preferences.

- **Be One of Us Page (work-with-us.html)**

- Current Job Vacancies: Junior Creative, Merch Designer, etc.
- Benefits: Access to NDN events, Generous Holiday Allowance, Dress as you please, Free Parking, Gym Access, etc.

3.2.2 Sub Modules:

The application also includes pages for:

- **Service Page:** Covering shipping, returns, refunds policies and shipping products location checking option.
- **Privacy Policy Page:** Outlining how customer data is handled.
- **Terms and Conditions Page:** Detailing user and company responsibilities.

3.3 User Roles:

The application supports multiple user roles, each with specific access privileges:

- **Guest Users:** Browse products and add items to a temporary cart.
- **Signed Users:** Manage product listings, handle user queries, and oversee order processing.
- **Registered Users:** Access additional features such as saved preferences, order history and VIP membership.

3.4 Color Theme:

Various variations of blue, red, green, black and white colors have been used for this product.

3.5 File System Tree Structure:

4 Application Features

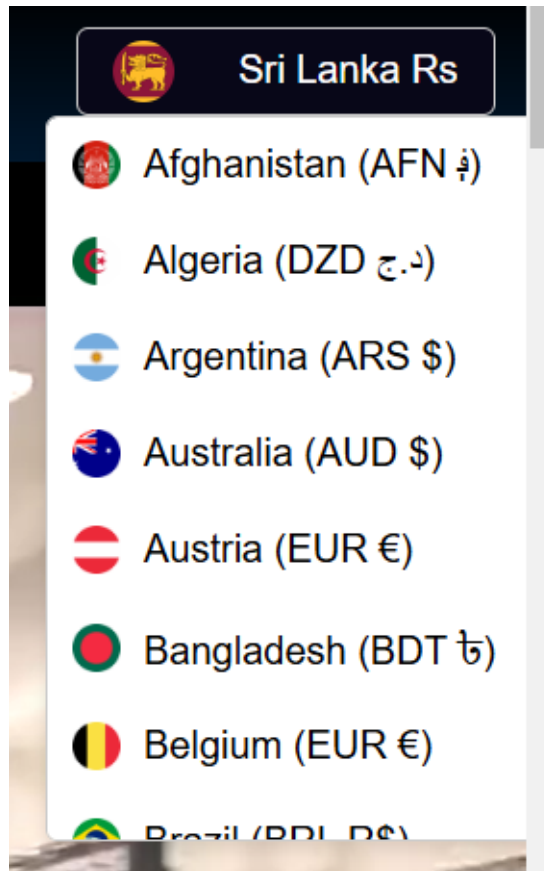

4.1 Web Application Features:

4.1.1 Home Page:

❖ Currency Change

- Allows users to change currency based on their country. This setting is applied throughout the site.

<--- Currency Dropdown List.png -->

<--- JS Code for Currency Dropdown List -->

```

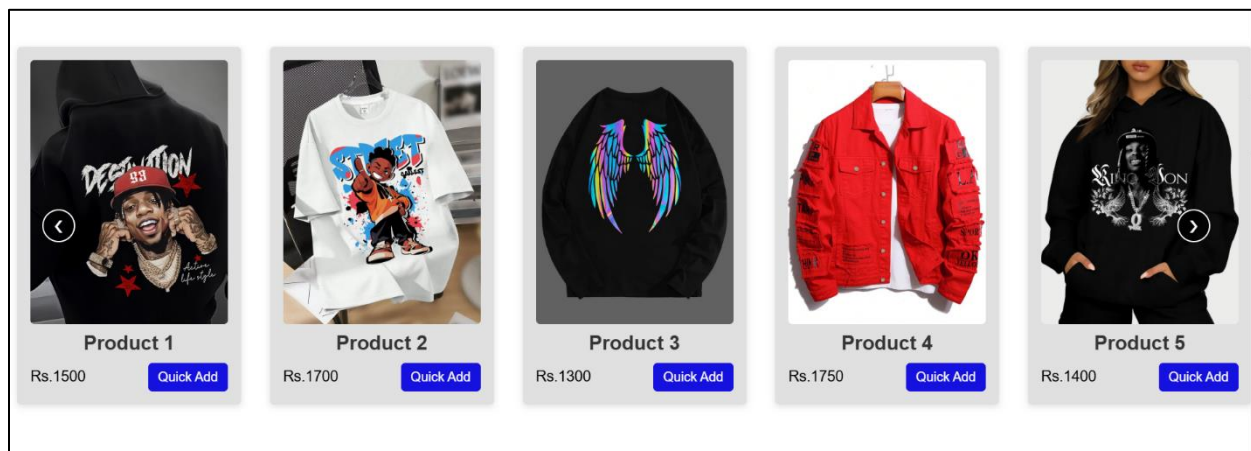

1 //----- JS Code for Currency Dropdown List -----
2 // Select dropdown components
3 const countryDropdown = document.querySelector('.country-dropdown');
4 const countryDropdownBtn = document.querySelector('.country-dropdown-btn');
5 const countryDropdownContent = document.querySelector('.country-dropdown-content');
6 const countrySelectedFlag = document.getElementById('country-selected-flag');
7 const countrySelectedCountry = document.getElementById('country-selected-country');
8
9 // Toggle dropdown visibility
10 countryDropdownBtn.addEventListener('click', () => {
11   countryDropdown.classList.toggle('open');
12 });
13
14 // Handle option selection
15 countryDropdownContent.addEventListener('click', (event) => {
16   const countryItem = event.target.closest('.country-dropdown-item');
17   if (countryItem) {
18     const selectedFlagSrc = countryItem.querySelector('.country-flag-icon').src;
19     const selectedCountryName = countryItem.dataset.country;
20
21     // Update the selected flag and country name
22     countrySelectedFlag.src = selectedFlagSrc;
23     countrySelectedCountry.textContent = selectedCountryName;
24
25     // Close the dropdown
26     countryDropdown.classList.remove('open');
27   }
28 });
29
30 // Close dropdown when clicking outside
31 document.addEventListener('click', (event) => {
32   if (!countryDropdown.contains(event.target)) {
33     countryDropdown.classList.remove('open');
34   }
35 });
36
37
38

```

❖ Product Display (Horizontal Scroll)

- The home page prominently displays product categories (All Products, New Arrivals, Popular Items) in horizontal scroll lines, offering a visually engaging way to explore items.

<--- Horizontal Scroll Products Bar.png -->

<--- JS Code for Horizontal Scroll Products Bar -->

```

750 // Load products into horizontal scroll
751
752 function loadProducts() {
753   const container = document.getElementById('home-products-container');
754   container.innerHTML = products.map(product => `
755     <div class="box" onclick="navigateToProductDetails('${product.id}')" onmouseover="changeImage(this)" onmouseout="resetImage(this)">
756       <div style="background-image: url('/assets/images/${product.image}');" class="img-div" data-original-src="/assets/images/${product.image}" data-hover-src="/assets/images/${product.hoverImage}"></div>
757       <p class="product-name">${product.name}</p>
758       <div class="product-details">
759         <span class="product-price">Rs. ${product.cost + sizePriceAdjustments.L}</span>
760         <button class="quick-add-button"
761           onclick="event.stopPropagation(); openQuickAddPopup('/assets/images/${product.image}', '${product.name}', 'Rs. ${product.cost + sizePriceAdjustments.L}')">Quick Add</button>
762       </div>
763     </div>
764   `).join('');
765 }
766
767 function changeImage(element) {
768   const image = element.querySelector('.img-div');
769   const hoverSrc = image.getAttribute('data-hover-src');
770   if (hoverSrc) {
771     image.style.backgroundImage = `url(${hoverSrc})`;
772   }
773 }
774
775 function resetImage(element) {
776   const image = element.querySelector('.img-div');
777   const originalSrc = image.getAttribute('data-original-src');
778   if (originalSrc) {
779     image.style.backgroundImage = `url(${originalSrc})`;
780   }
781 }
782
783 function openQuickAddPopup(imageSrc, productName, productPrice) {
784   document.getElementById('popupProductImage').src = imageSrc;
785   document.getElementById('popupProductName').textContent = productName;
786   document.getElementById('popupProductPrice').textContent = productPrice;
787   document.getElementById('quickAddOverlay').style.display = 'block';
788   document.getElementById('quickAddPopup').style.display = 'block';
789 }
790
791 function closeQuickAddPopup() {
792   document.getElementById('quickAddOverlay').style.display = 'none';
793   document.getElementById('quickAddPopup').style.display = 'none';
794 }
795
796 window.onclick = function(event) {
797   const overlay = document.getElementById('quickAddOverlay');

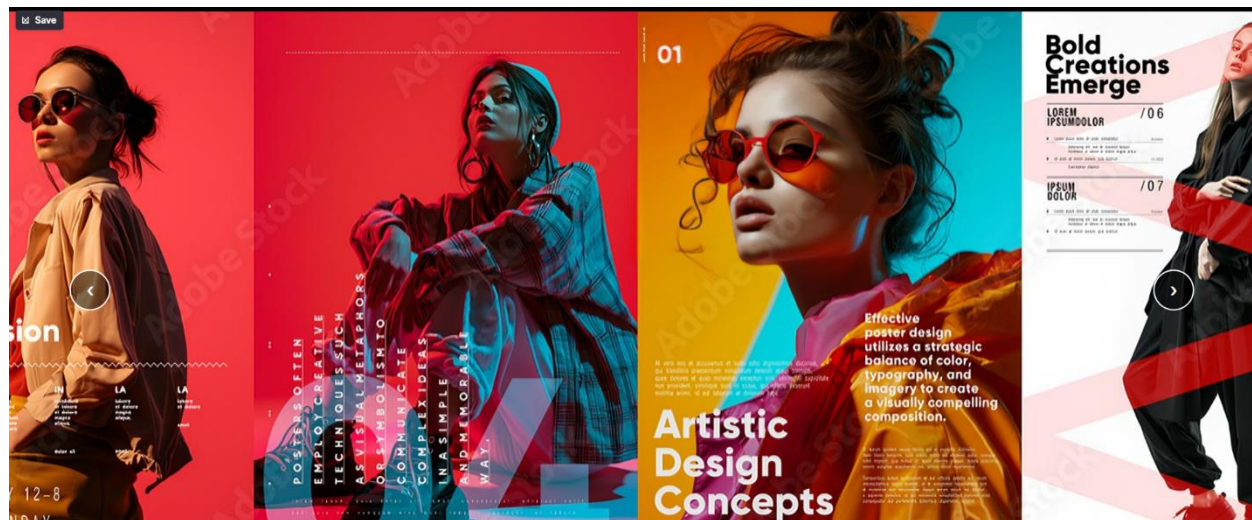

```

❖ Banners

- Sales and new arrival banners use a slideshow effect for attention.

<--- Sales Banners Slideshow -->

<--- JS Code for Sales Banners Slideshow --->

```

295 //----- new arrivals banner slideshow -----//
296
297 let sliderW = document.querySelector('.sliderW .listW');
298 let items = document.querySelectorAll('.sliderW .listW .item');
299 let next = document.getElementById('next');
300 let prev = document.getElementById('prev');
301 let dots = document.querySelectorAll('.sliderW .dots li');
302
303 let lengthItems = items.length - 1;
304 let active = 0;
305 next.onclick = function() {
306     active = active + 1 <= lengthItems ? active + 1 : 0;
307     reloadSliderW();
308 }
309 prev.onclick = function() {
310     active = active - 1 >= 0 ? active - 1 : lengthItems;
311     reloadSliderW();
312 }
313 let refreshInterval = setInterval(() => (next.click()), 3000);
314 function reloadSliderW() {
315     sliderW.style.left = -items[active].offsetLeft + 'px';
316     //
317     let last_active_dot = document.querySelector('.sliderW .dots li.active');
318     last_active_dot.classList.remove('active');
319     dots[active].classList.add('active');
320
321     clearInterval(refreshInterval);
322     refreshInterval = setInterval(() => (next.click()), 3000);
323
324 }
325
326 dots.forEach((li, key) => {
327     li.addEventListener('click', () => {
328         active = key;
329         reloadSliderW();
330     })
331 })
332
333 window.onresize = function(event) {
334     reloadSliderW();
335 };
336
337
338

```

- Animation Slideshow

<--- Animation Slideshow.png -->

873     slider.classList.remove('next')
874   } else {
875     slider.classList.remove('prev')
876   }
877 }, {once: true}) // Remove the event listener after it's triggered once
878
879
880

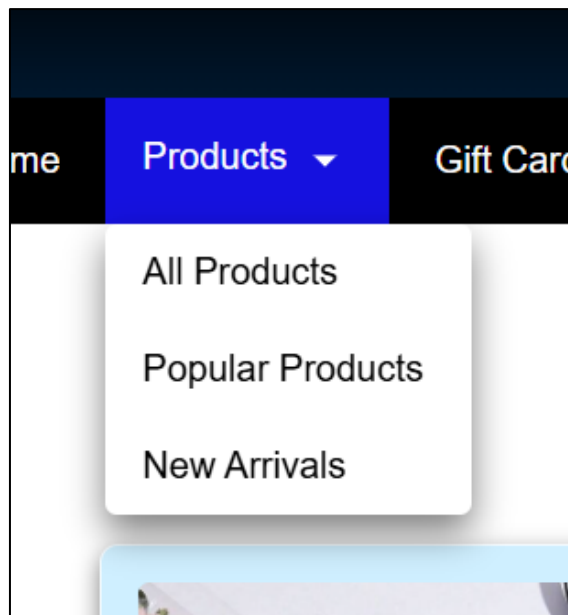

```

4.1.2 Product Pages:

❖ Product List Pages

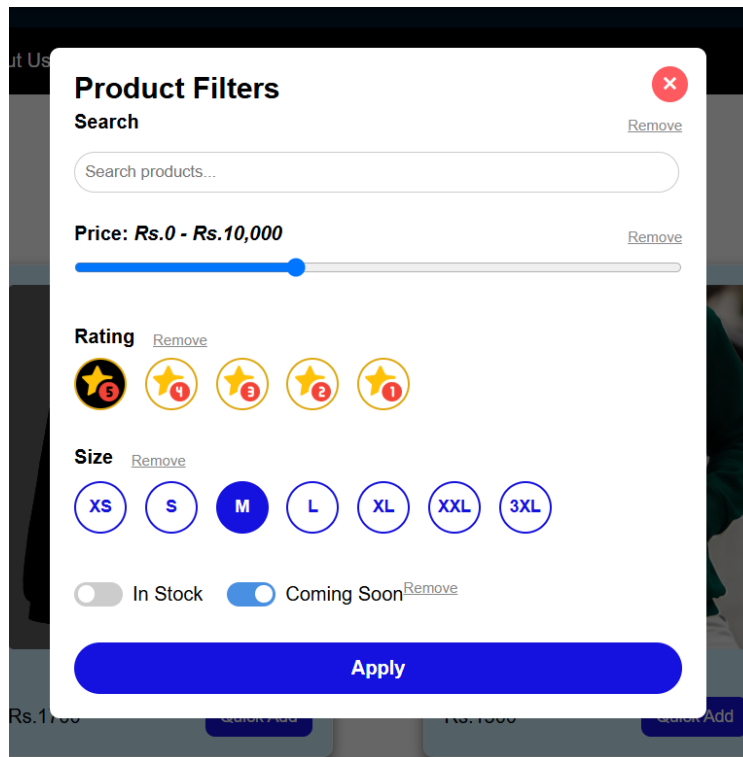

- Lists products as all products, new arrivals and popular items; with add to the cart option.

<--- Product List Layout.png -->

- Filter Option: By price, size, rating, stock availability and other parameters; ensuring they find exactly what they need.

<--- Product Filter Popup Layout.png -->

<--- JS Code for Product Filter Popup Layout -->

```

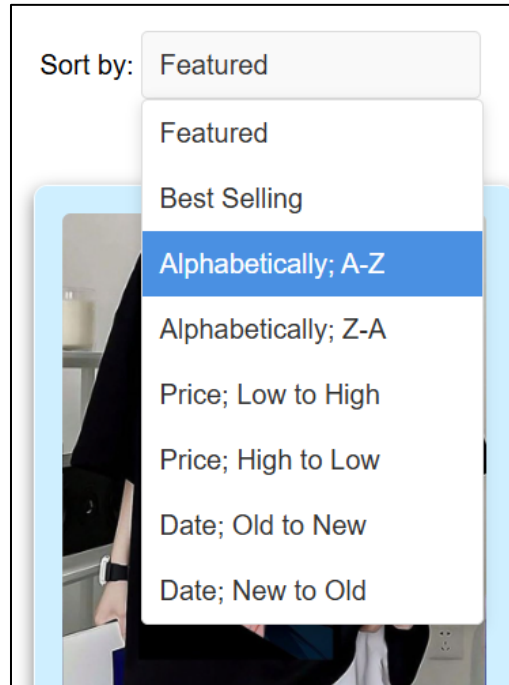

1 //----- filter popup window -----
2 // JavaScript for Filter Popup functionality
3 document.addEventListener("DOMContentLoaded", function () {
4     const filterModal = document.getElementById("filter-modal");
5     const openFilterBtn = document.getElementById("open-filter-btn");
6     const closeFilter = document.getElementById("close-filter");
7     const applyFilter = document.getElementById("apply-filter");
8
9     // Open filter modal
10    openFilterBtn.addEventListener("click", () => {
11        filterModal.style.display = "flex";
12    });
13
14    // Close filter modal
15    closeFilter.addEventListener("click", () => {
16        filterModal.style.display = "none";
17    });
18
19    // Close modal when clicking outside the filter content
20    window.addEventListener("click", (event) => {
21        if (event.target !== filterModal) {
22            filterModal.style.display = "none";
23        }
24    });
25
26    // Apply button
27    applyFilter.addEventListener("click", () => {
28        alert("Filters applied!");
29        filterModal.style.display = "none";
30    });
31 });
32
33
34
35

```

- Sort-By Filter Option:

By best-selling, alphabetically (A to Z / Z to A), price (Low to High / High to Low), date (Old to New / New to Old) and other parameters; ensuring they find exactly what they need.

<--- Sort by Filter Layout.png -->

<--- JS Code for Sort by Filter Layout -->

```

36
37
38 //----- drop down list -----
39 // JavaScript for custom dropdown functionality
40 document.addEventListener("DOMContentLoaded", function () {

4.1.3 E-Gift Card Page:

- Users can purchase e-gift cards ranging from Rs. 1000 to Rs. 20,000.
- Customizable card quality based on user preferences.

<--- JS Code for Customizable Card Quality -->

```

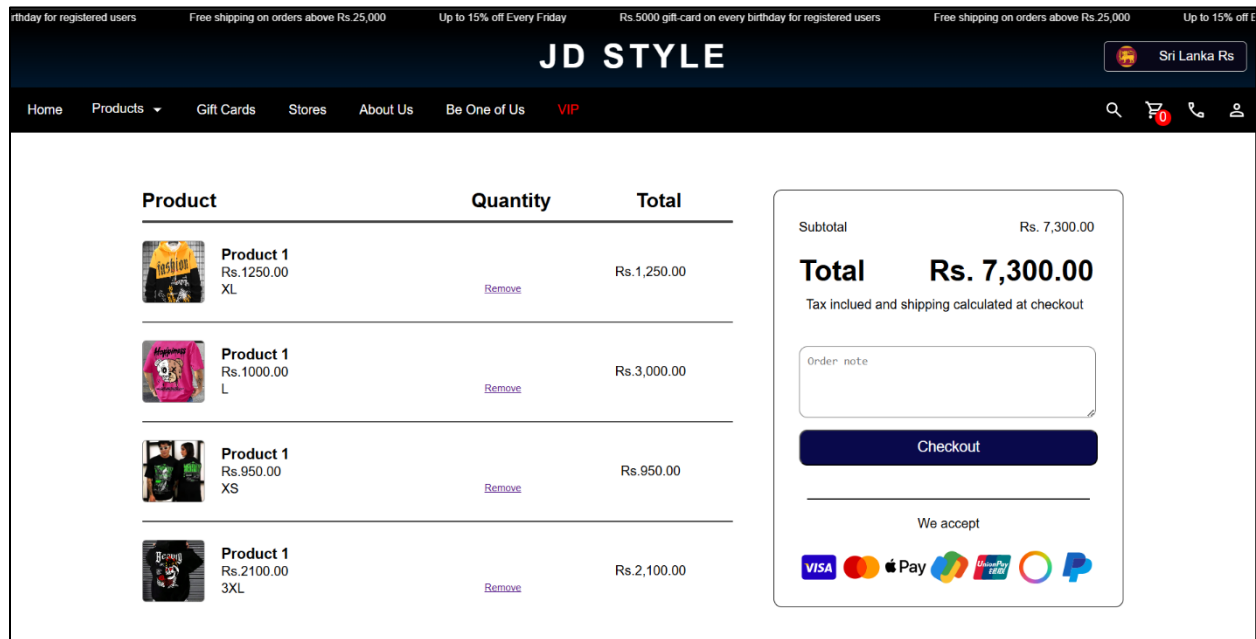

1 // Quantity control functions
2 function decreaseQuantity() {
3     const qtyElement = document.getElementById("txtQty");
4     let quantity = parseInt(qtyElement.textContent, 10);
5     if (quantity > 1) {
6         qtyElement.textContent = quantity - 1;
7         // calculateAndDisplayPrice();
8     }
9 }
10
11 function increaseQuantity() {
12     const qtyElement = document.getElementById("txtQty");
13     let quantity = parseInt(qtyElement.textContent, 10);
14     qtyElement.textContent = quantity + 1;
15     // calculateAndDisplayPrice();
16 }
17
18 // Quantity Function
19 // function decreaseQuantity() {
20 //     let quantityInput = document.getElementById('quantity');
21 //     if (quantityInput.value > 1) {
22 //         quantityInput.value--;
23 //     }
24 // }
25 // function increaseQuantity() {
26 //     let quantityInput = document.getElementById('quantity');
27 //     quantityInput.value++;
28 // }
29
30 //Pop Up message
31 function openPopup() {
32     popup.classList.add("open-popup");
33 }
34 //weda na-----, search button skata wage "weda": Unknown word.
35 // Optional: Close overlay if user clicks outside the search content----
36 //window.onclick = function(event) {
37 //     let overlay = document.getElementById("buttons");
38 //     if (event.target == overlay) {
39 //         closePopup();

```

4.1.4 Cart Page:

- Displays details of selected items: product name, size, quality, price.
- Subtotal Price Calculation.
- Ability to remove or change the quantity of products.

<--- Cart Page -->

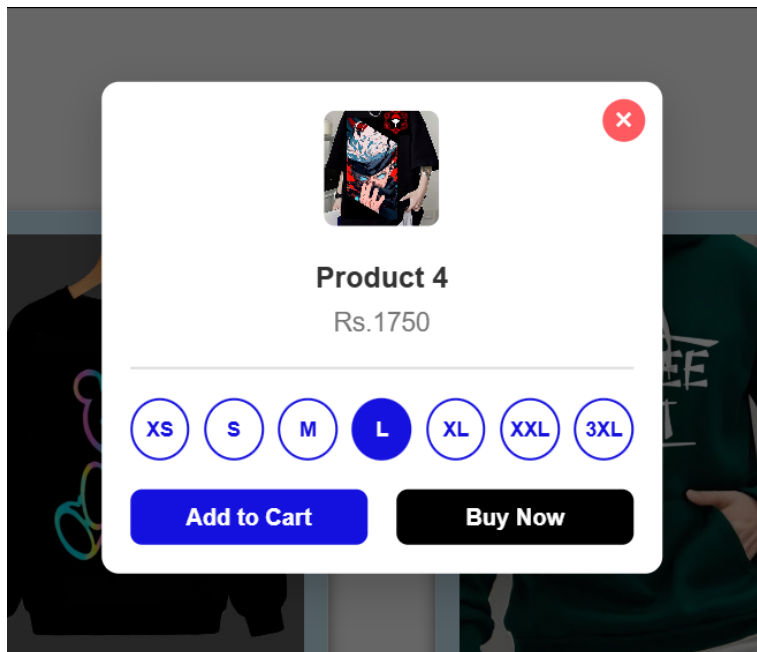

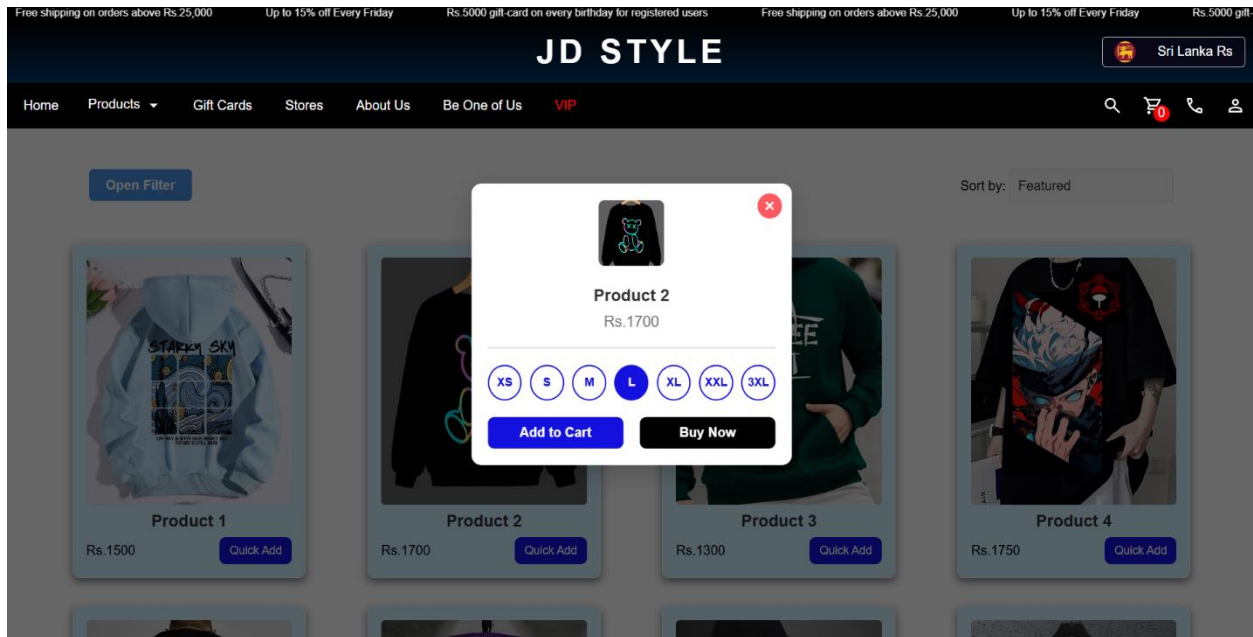

4.2 User Convenience Features:

All Popup Messages Can Close; Clicking Outside the Popup or Using the Close Button.

❖ Add to Cart Popup

- Appears when clicking the quick add button on product pages. Users can change size and confirm the addition.

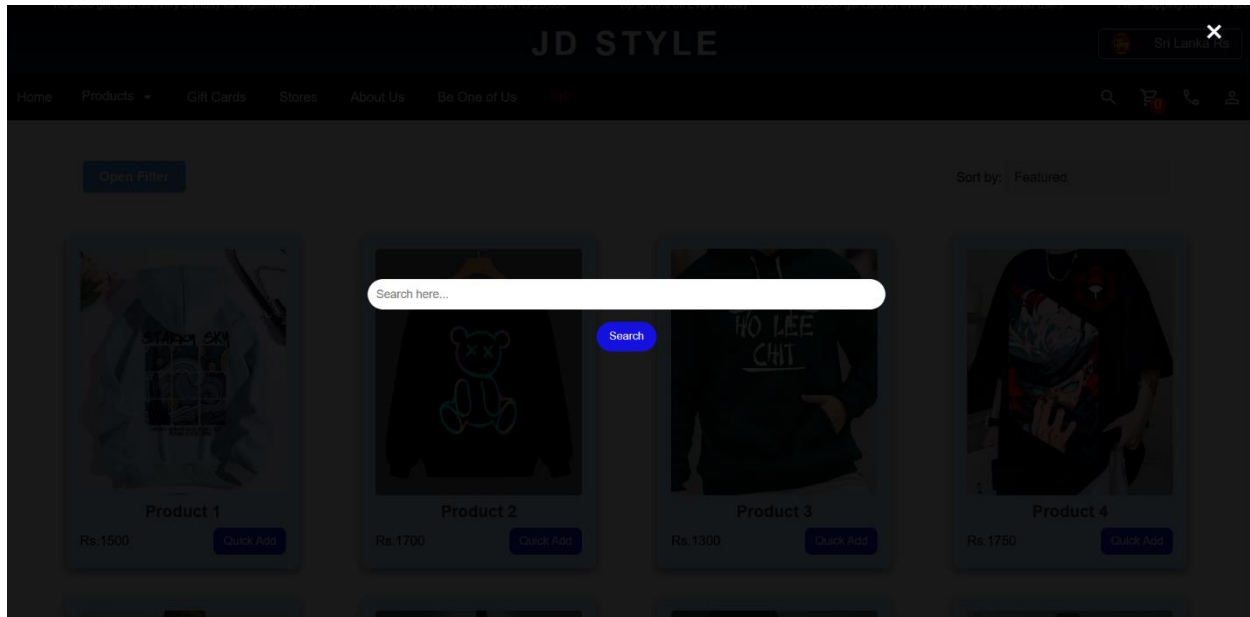

<--- Quick Add Popup.png -->

❖ Search Popup

- Enables global site search.

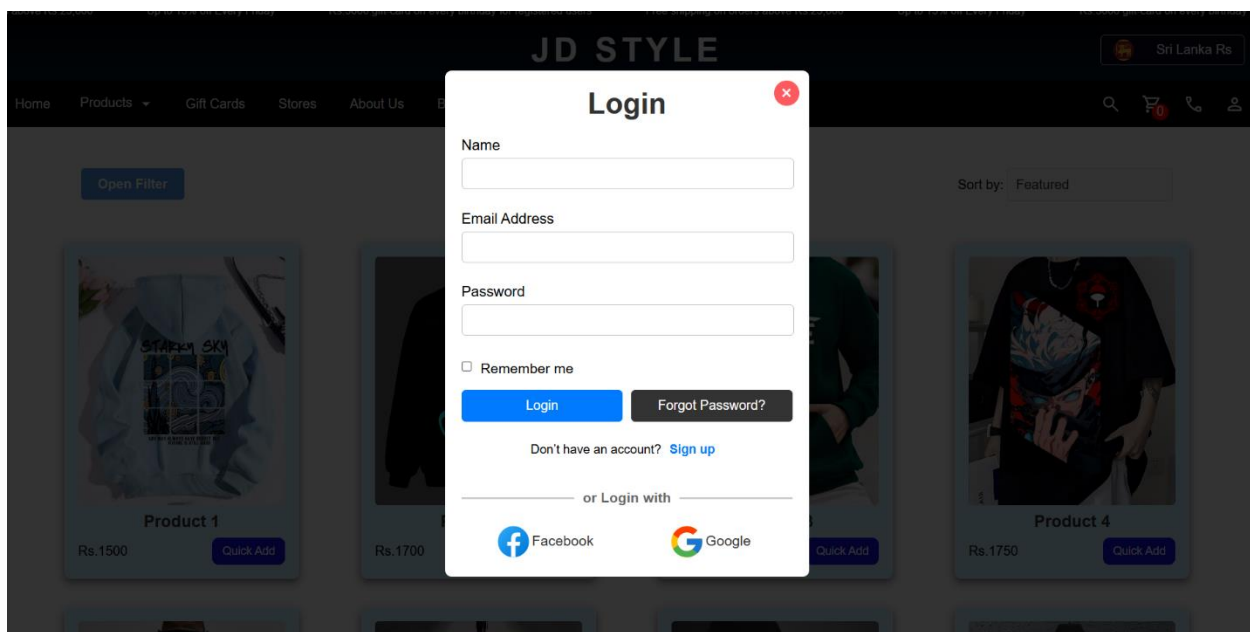

<--- Search Popup.png -->

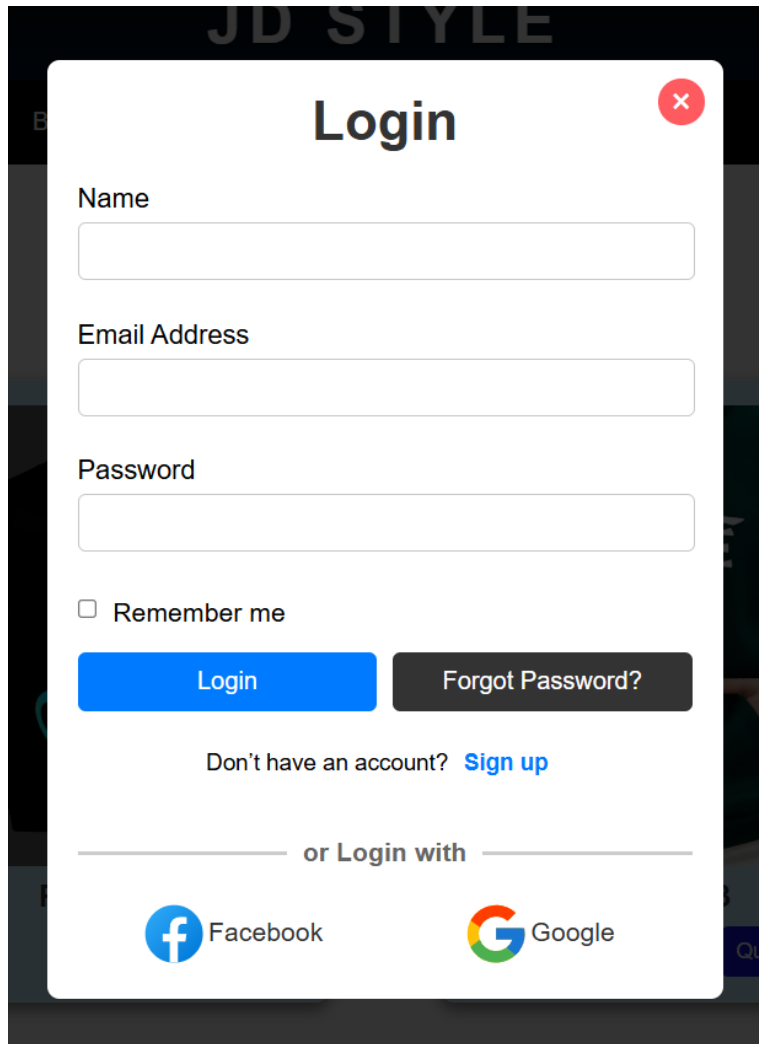

❖ Login Popup

- Allows users to login or sign up.

❖ Filter Popup

- Filters products based on price, rating, size, and availability.

<--- Filter Pipup Layout -->

4.3 Key Benefits:

The following benefits for you who use the JD STYLE web application.

- ❖ **Convenience:** Shop from anywhere with a user-friendly interface.
- ❖ **Personalization:** Get personalized recommendations and location-based services.
- ❖ **Reliability:** Enjoy a secure and dependable shopping experience.

5 Planning & Sketching the Application

5.1 Pre-Design Sketches & Notes:

- ❖ All the Pre-Design notes are contained in the READ-ME (Product Doc) folder named "Assignment 01 (Pre-Design Notes)".

5.2 Reference Notes:

- ❖ Images and Pictures: [google.com](https://www.google.com) , stock.adobe.com/lk/photos,
[pinterest.com](https://www.pinterest.com)

- ❖ You Tube Videos as Playlist:

https://youtu.be/rIFjsp4BtRA?list=PLNQ3Pic9lpc_p3_ajmPSTSlyJApxBIEb

6 User Guide

If the site does not open with the index.html file, use an html file in the pages folder.
(Except blog.html, portfolio.html pages)

6.1 Navigation Guide:

The application's navigation is designed to be intuitive and user-friendly, ensuring smooth user flow.

❖ Top Navigation Bar:

- Includes links to Home, Products, Gift Cards, Stores, About Us, Be One of Us, VIP, Contact Us and Login/Sign in.
- Features a search bar for quick product lookup.

❖ Category Menu:

- Category menu for navigating through product categories like Men's, Women's, Kid's and Accessories.

❖ Footer:

- Contains all links with additional links to Portfolio, Blog, FAQs, Privacy Policy, Terms & Conditions and Social Media handles.

7 Developer Guide

❖ File Structure:
